L. M. LARSON, Proprietor.

Funeral of Reinhold Goertz.

Mr Reinhold Goertz, an old-time resident of this district, passed away on Thursday last at the age of 50 years. Deceased was born in Austrian Galicia in 1884, and came to Canada in 1899. He was married in the year 1913.

Deceased was well known throughout the district, and had a host of friends. He had sat at Inga M.D. Council board as the Councilor from Div. 6 for a number of years and had been Reeve of the Municipality; he had also served as a trustee on the Stony Plain School Board.

He left to mourn his loss his wife: 2 sons Norman and Oscar; 2 daughters Violet and Ella, all at home; 7 brothers, Henry, Carl, John, Louis, Rudolf, Philip, Fred, all living in this district; 8 sisters Mrs Jac Armbruster, Vernon, B.C. Mrs Percy Bearham, Onoway; Mrs F Hasse, Winnipeg; Mrs Carl Reichert, Poland; Mrs Philip Fuhr, Stony Plain, Mrs Wm Schweitzer, Chicago; Miss Emelia and Miss Elsie.

The funeral took place Sunday afternoon, and was attended by a large number of friends of the family. A service was held at the family residence by Pastor Emil Eberhardt; and a service at St. Matthew Lutheran Church. Inter-

Brightbank News.

Seeding in this district is over 60 p.c. completed.

Mr J Kotschrofsky was a Sunday visitor with Mr Jameson.

It is now estimated that 80 p.c. of the wheat sown in this district is in the ground. Most farmers here like it very much, owing to its color and earliness. Hansen Corners farmers also praise it.

Prairie fires have been doing considerable damage this Spring. J McDonald left his green wood pile out some distance from his farm buildings to be split. The pile caught fire, and only a few loads were saved.

Gold mining is all the rage on the river now. A number are using machinery for washing, run by gas engines. A curious thing happened the other day, when a miner got his engine running backwards and couldn't get it stopped until he got the assistance of a farmer living half a mile away.

ment took place in the family plot in St Matthew churchyard.

The pallbearers were 6 brothers: Henry, Karl, Rudolf, Louis, Philip, and John.

Card of Thanks.

Mrs R Goertz and Family wish to thank all their friends for their expressions of sympathy and kindly assistance given, on the occasion of their recent sad bereavement.

Stevens vs. Stevens.

The action of Florence Stevens against Levi G Stevens was heard by Mr Justice Ford on Thursday last. The action was for divorce, custody of the child of the marriage, and alimony and maintenance in the sum of \$100 per month. No defence was offered on the divorce issue and a decree nisi was granted. With regard to the custody of the child, the judge felt that satisfactory arrangements could be made between the parties themselves, and in the meantime the child was left in the custody of the father. Maintenance was set at \$50 per month, pending the final settlement of certain matters.

S. McCuaig appeared for Mrs Stevens; Geo. J. Bryan for defendant.

Basketball Notes.

Stony Plain basketball girls surprised their backers last week by their good form as shown in their game with Walther League girls. The game took place on St Matt's court and was watched by a good crowd of fans. The final score: Walther League girls 9; Stony girls 13. The line ups—

Stony Plain: I Zucht, E Fischer, Ruth Leeder, Margaret Pailer and Mary Campbell.

Walther League: A Forster, L. Oppenheimer, V Goertz, E Dannhauser, Irma Michael.

Cosch Meyer took his basketball team to the Grove on Friday Eveg, and played the High School Girls there. Final score: Stony 5, Grove 20. Stony line-up: E Fischer, R Leeder, I Zucht, M Campbell, I Michael, Margaret Pailer, Esther Dannhauser.

Friday Night's Movie.

Mr Goodman the movie man comes to town on Friday Eveg next, May 25, with "Smiling Through," with Norma Shearer in the leading role. Others in the cast of this popular picture are Frederick Mack and Leslie Howard. Those fans who have seen Norma Shearer in her other successes will not miss seeing her in "Smiling Through," which is said to be her greatest. Moose Hall, Friday, May 25th.

Stony's New "A-C" Cafe.

The town's newest quick lunch stand opened for business on Saturday last, on scheduled time, the opening ceremony being a wave of the waffle wand by Proprietor Hilding Larson. The first day's business proved conclusively that what was wanted was an establishment of this kind right in the heart of the business district. Practically all of Hilding's friends were present thru the day, and a number of messages of congratulation were received from his friends at outside points. In the evening the Town Band serenaded the proprietor.

Music Festivals And Spring

The music festival season, whether by accident or design, coincides with spring in this Western country; and it is peculiarly fitting that it should. The two seasons are highly compatible.

Spring is essentially the season of song—the joy of new birth, of life freed from the trammels of winter, of new hope and refreshment, of the seed-time and the filling and bursting of the buds, of the urge to new endeavor, of faith and a more expansive contentment. The pagans of old celebrated its advent with rites in which music was the vehicle of expression of that mirth and jollity the after sun inspired.

The association of spring with music is universal—has been universal down the ages; for in the spring, nature awakes from long hibernical sleep to the notes of its own orchestra and the song of its own choristers. What more fitting than that the soul of man should "blossom in singing" when spring brings life anew to prairie and woodland!

The music festival idea has given point and purpose to man's urge to vocalize the finer aspects of his emotional existence and experience. The remarkable growth of that idea in prairie communities, indicated in the consistent expansion of the festivals, is one of the most reassuring evidences of the enduring quality of the social organization these communities reflect. The joy of singing and the love of music, emotions never realized nor appreciated to the full unless they are shared, are infallible knitters of closer ties of friendship and fellowship. The association thus cemented inures to a deeper sense of that brotherhood of man which makes the whole world kin.

Song is of the heart and of the spirit—a weaver of the very fabric of community life. Music symbolizes the harmony of which that life is compact and without which it cannot long survive. It is significant that visitors to rural communities of the prairie west have been struck with the fullness of the social life obtaining in them, despite the lack of those adjuncts which are considered indispensable to the amenities of city life. This feature has been remarked upon particularly in relation to the remoter communities where residents have learned to rely upon their own resources and their own proclivities for social organization, and where, in co-operative endeavor, they have managed to add spice and variety to their ordinary routine.

Music and song have thus become the greatest adjuncts of peace and contentment among the scattered communities of the far-flung prairies. They have contributed greatly towards the alleviation of the pangs of disappointment. They have made hardship less onerous, reaction less disruptive. These annual festivals, bringing, as they do, urban and rural dwellers of kindred tastes together, and demonstrating, as they do, a heritage common to the diverse peoples composing the population of the western provinces, are contributing much towards developing that fellowship which, wider than the communal, reaches through the provincial into the national life.

It is right that the winter should be a season of preparation and practice; but it is essential that the festivals should be of the spring. That's where they belong.

Stowaway Makes Good

Boy On Antarctic Ship Has Become Popular With Crew

Fourteen-year-old Einar Lamberg, who stowed away on the whaling factory ship Southern Princess, has made good. Einar was discovered when the ship was on her way to the Antarctic. He had crept into the ship the night she left Sandefjord, Norway, and hidden under a barrel until hunger forced him to reveal himself. The skipper admired the lad's pluck, and made him assistant steward. His quickness and keenness soon made the boy extremely popular with all the crew. In dark hours after a hurricane had smashed the rudder of the Southern Princess and it seemed certain that she would be lost with all hands, Einar proved his worth. His bright cheery manner and utter disregard for danger helped the morale of the older men.

According to experiments in Italy, hens fed whole wheat flour laid more fertile eggs than hens fed white flour, and the chickens from such eggs were larger and healthier.

In their natural state the ruby and the sapphire are identical in composition, their difference in color being due solely to naturally included metallic oxides.

Shortness of Breath Weak, Sinking Feelings

If going up stairs, climbing hills, walking too far; if the least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's H. & N. Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

Wolves Kill Caribou

Trapper Brings Tale Of Wanton Destruction From North

Bringing stories of terrific onslaughts made by roving packs of wolves while the caribou were migrating, Edwin Sunquist, trapper of the sub-Arctic, reached The Post Manitoba, following nine months of travel west of Churchill.

Sunquist with his partners, John Ivanichuk and Charles Hendren, left last July with supplies for winter trapping 165 miles north of Brochet. They travelled by canoe, and reached their headquarters on Oct. 11. During the trip they saw no caribou. But on the morning after their arrival, they went outside to find the migrating herds passing their door. Thousands of animals were moving south. Following close on their heels were packs of from five to 35 wolves. Sunquist said the wolves in many cases killed purely for wantonness, and when there were not deer to knock down, they turned on each other.

The tall-growing hybrid dolphins so popular in Canadian gardens can be raised from seed easily, but, as they do not come true, anyone wishing to increase the stock of a special plant must do so by division of the roots of that plant.

Sky Changes Coloring At Different Altitudes

Moscow Experts Studying Records Taken In Stratosphere Flight

Remarkable evidence of changes of color in the sky at different altitudes in the stratosphere is one of the results which have been obtained by the experts in Moscow who are studying the records left by the crew of the Soviet stratosphere balloon Stratoshtat which crashed after reaching the record height of over 13 miles.

Investigations are being carried on under the direction of M. Thomson, the senior-scientific worker of the Central Weather Bureau. The gondola of the Stratoshtat carried numerous instruments for making automatic observations at various periods of the ascent and descent.

Among the data on which the experts have been working are twelve photographs taken at different altitudes, and twenty-seven spectrum observations.

The results of the preliminary investigations are stated to show that the sky gradually changes color as follows: 0.28 miles, marine blue; 6.83 miles, dark blue; 8.08 miles, dark violet; 11.81 miles, dark violet marine; 13.05 miles, dark violet grey; 13.67 miles, black grey.

This evidence bears out observations made by Professor Piccard, the Belgian balloonist, and also by the crew of the Soviet Stratoshtat U.S.S.R., which made a previous high record attempt, who recorded that the sky at 11.81 miles high was "very dark violet."

The experts state that valuable records of sky colors were made by M. Vassenko up to the time when disaster overtook the balloon at a height, apparently, of 7.46 miles on the downward descent.

China's Guide For Pilots

Lighted Clock Greets Ships Entering Port At Shanghai

Instead of Liberty's flaming torch to greet arriving vessels, China has erected a memorable landmark in a clock, thirty feet in diameter. Visitors entering the Whangpoo river off the Woosung Forts are now struck by the new tide indicator.

Figures from zero to 18 cover the rim of this gigantic face which at night is illuminated by Neon tubes visible for at least a mile out in clear weather.

The hands of the clock are geared to an automatic mechanism for registering tide depths. The device was put into position by the Whangpoo Conservatory Board as a guide to skippers.

The base of the dial is a great arrow, whose position shows whether the tide is rising or falling. The complete outfit, rising high above the Woosung forts, is a memorable sight to visitors, particularly when it shines in welcome out of the darkness.

Tenants Steal Building

Remove It Piece By Piece To Spoil Landlord

Charged with stealing a building, several tenants of a row of flats have been arrested in Khodel, Poland. Back of this is a case of revenge against the renters' landlord. Following a long series of clashes between the occupants and the owner, the tenants got together and decided to steal the building. Stone by stone, door by door, window by window, they removed their flats several miles away and reconstructed them without the shadows of a landlord's calls. The irate owner had them arrested, but is puzzling how he will get his building back where it belongs.

Of recent years, a number of promising smooch-averse barbers have been produced by different plant-breeding institutions, including the Dominion Experimental Farms, but these varieties have not yet been tested for a sufficient length of time to say which is the most desirable. For the present, however, the variety called Velvet is favoured in Eastern Canada, while Regal appears most promising in the West.

More Tobacco for the Money! and POKER HANDS, too with TURRET FINE CUT!

Figures Show Improvement

Average Value Of Canadian Farm Stock Has Increased

The average value of farm land in Canada in 1933, including both improved and unimproved land as well as dwelling houses, barns, stables and other farm buildings, is placed at \$24 per acre in an estimate recently issued by the Canadian government. This shows no change since 1932. Average farm land values range from \$63 per acre in British Columbia to \$16 per acre in Manitoba, Saskatchewan and Alberta.

Average values placed on farm livestock are: Horses, \$52; milch cows, \$31; other cattle, \$17; sheep, \$4; swine, \$8.89. The changes from 1932 values are slight except in the case of swine, which have almost doubled, having increased from \$4.73 to \$8.89. In the same period the average value of wool increased from five to ten cents a pound. Total value of all farm livestock in 1933 amounted to \$403,135,000, an increase of about \$27,500,000 over 1932. The value of farm poultry is placed at \$33,456,000, a slight falling-off from the value in the previous year.

Average wages of farm hands during the summer season were \$17 per month for men and \$10 per month for women, board and lodgings, in both cases, being furnished by the employer. Counting in the value of board the average wages for men were \$32 per month and for women \$22 per month.

Icelandic capital is named Reykjavik, meaning smoking harbor, after the hot springs, which are so prevalent in the country.

Cattle are now branded plainly with a chemical that removes the hair and leaves the skin white.

"Made In China"

Oriental Make Up Irish Linen Handkerchiefs For American Trade

Handkerchiefs for sale in Atlantic City bearing the tickets, "Pure Irish Linen," and "Made in China," so aroused a visitor that he promptly wrote to the Belfast Times about it. In reply John Gilliland of Belfast, Director of the Irish Linen Guild declared that China is now buying thousands of pieces of linen to be made up into handkerchiefs and embroidered for the American trade. "Although Irish linen is used," he said, "owing to U.S. Customs laws, articles coming into that country can only be accepted if they are marked with the place of origin—that is China. It is really a question of China obeying the Customs laws. As a matter of fact Ulster manufacturers are keeping a good grip on the handkerchief trade in America."

Have Never Seen Rain

Because of drought there are children ten years of age in South West Africa who have never seen rain. They have been discovered by the Minister of Lands who reports that rain has not fallen for seven years in some districts.

W. N. U. 2047

Future World Peace Will Be Assured When Nations Learn To Live And To Let Live

The following article, being an editorial on war, appeared in a recent issue of the *Rotarian Magazine*:

Anyone who believes that from the beginning of time the World War was fated to come in an illogical position even to hope for, a warlike world. But he who regards all wars as a direct consummation of policies of participating nations, can build an optimism around a conviction that men, being thinking animals, need not forever blunder into bloodshed but some day will consciously choose courses of action that prolong peace.

Wars do not happen suddenly. They are made in time of peace. Then popular desires are shaped into national policies which conflict and eventually clash with those of other countries.

It is interesting to conjecture what might have happened if, say in 1900, peoples of the 27 nations that were drawn into the holocaust of 1914-18 had clearly realized that the policies then being born would lead to that conflict. Perhaps, in considering whether the national aims should be pursued unmodified, far-seeing leaders might have stated the case thus: "These policies will lead to war. That war will take 30,000,000 lives, cost \$400,000,000,000, snap the morale of civilization, precipitate a worldwide depression.

"If these policies are not pursued, 30,000,000 lives will be saved, civilization will proceed without interruption. And with the \$400,000,000,000 we shall be able to give a \$2,500 house, furnished with \$1,000 of furniture, and five \$100-acres to every family in the United States, Canada, Australia, Great Britain, Ireland, France, Belgium, Germany and Russia; to put a \$5,000,000 library and a \$10,000,000 university in every city of 20,000 population in the countries named; and, furthermore, establish a fund which, at five per cent. interest, will for all time pay a \$1,000 salary to 125,000 teachers and 125,000 nurses."

With the question so posed, it would seem to us certain that the nations of 1900 would have been willing to sacrifice even cherished national aims for the benefits of peace. But would they? With thousands of maimed men yet lying and fleets of merchant vessels rusting in harbors to remind us of the cost of the last war, we of 1924 persist in desires which are crystallizing into national aims that can but lead to conflict. Realistic newspaper correspondents each morning send dispatches, ready to hasten to the cradle of "the next war"—a war that admittedly will bankrupt civilization.

It can, of course, be avoided—at a price. The price is that nations learn how to live and to let live, even though it involves relinquishing of what in an early day of relations between individuals was called "rights". Men of goodwill will continue to believe that some day governments having weighed the case, will elect to do this.

Finds Them Expressive

Many American Slang Terms Found In Oxford Dictionary

However rude or crude are American terms, they are so expressive and impudently near the truth that it is very hard to resist giving them a place in any honest lexicon. Such terms are "graft," "once-over," "foolproof" and "step on the gas." This was the explanation given by President George Gordon of Magdalen College, Oxford, England, for their inclusion in the new supplementary volume of the Oxford Dictionary. Among other phrases which have been introduced into the English language in the last 50 years and given a place in the dictionary are "all of a doo da," and "give it the once-over."

Rhubarb may be propagated from seed, but as the identity of the variety is likely to be lost through cross-breeding in the fertilization of the seed, it is better to propagate by transplanting sections of the root.

W. N. U. 2047

Points In Rose Planting

Necessary To Make Sure That Roses Have Not Become Too Dry

When new rose plants are received, it is important that the roots should not be allowed to dry out under any circumstances. It is a good practice when opening the parcel of rose plants to plunge the roots into water and leave them there for several hours, or to bury the plant, root and branch, in moist soil for a few days. Either of these practices will restore the moisture in the stems that has been lost during the winter season.

Hybrid tea roses should be planted about 18 inches apart; hybrid perpetuals, two and a half to three feet; and the rugosa hybrids, the most roses, and other large-growing hardy sorts about four feet apart. It is necessary to prune back severely, and the bushes should be planted deep enough so that the point of the union between stock and scion is from two to three inches below the surface of the ground. This is important, because, if the union is at or very near the surface, the sun shining on it hardens the wood and prevents a free circulation of sap, which is not desirable as a strong vigorous growth is necessary for best results. Roses need an abundance of moisture and the surface of the soil should be kept loose from spring until midsummer. After each rain the rose bed should be hoed or raked, leaving a rather loose surface, or during a dry time, if it is necessary to water the roses, the soil should be loosened after watering. It is better to water roses thoroughly occasionally, than to give them a light watering frequently.

The First Coal Mines

Pits Were Shallow And Coal Was Obtained By Tunnelling

Coal was first dug-in the British Isles on the south shore of the Firth of Forth. For centuries there were no means of draining coal pits, and early coal was obtained in hilly districts, where it could be reached by tunnelling. In some places shallow "bell pits" were dug. In 1719 the deepest coal mine in the country was only 360 feet deep. Gun-powder was first used to blast coal in that year. In pits where fire-damp accumulated, it was exploded each morning by "a resolute man of purpose," who went down clothed in rags saturated with water and provided with a long pole at the end of which was a lighted candle. There was no form of safety lamp until the year 1815.

MARY PICKFORD RETURNS TO THE CITY OF HER BIRTH

The famous screen star, Mary Pickford, went home to Toronto, the city of her birth, recently, and was accorded a tumultuous welcome. It was her first visit in many years and was made at the special request of Toronto, which is this year celebrating the centenary of its incorporation as a city. Above we see Miss Pickford as she responded to the various tributes tendered her at the city luncheon in her honor, while at the right is a view of one section of the enormous throng that crowded the City Hall to participate in the civic welcome given to the popular star.

By Ruth Rogers

AN ADORABLE NEW CAPED SLEEVE DRESS

And a likeable model from every point of view. You'll adore this delightful little model with all its new, young and modish features.

It has the cape sleeves so a la mode, sun back and wrapped skirt which allows plenty of freedom for motion.

Levity schemes in cottons, linen and tub silks can be worked out most attractively in this model. The sleeves can be of self-material, if you prefer.

Style No. 665 is designed for sizes 11, 13, 15, 17 and 19 years.

Size 15 requires 2 3/4 yards of 39-inch material with 1 yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Acted As Boomerang

Hit by its own torpedo, fired in naval manoeuvres at Hans Bay, Sweden, a vessel was considerably damaged. The torpedo was deflected and completing a circle, struck the ship from which it was fired.

Canada And United States Relationships To Be Studied By The Carnegie Endowment

Holland Destroying Cattle

Hopes To Put Dairy Industry On Paying Basis

The means to force prosperity by wholesale destruction of valuable property is extending to Europe. A plan has been authorized by the government of Holland whereby two hundred thousand head of valuable dairy cattle will be slaughtered in Holland. The returns from this go into a central fund and this fund is again used to purchase cattle for slaughter, the meat and by-products being disposed of on behalf of the central organization. It is said that the number of cattle in Holland in 1933 was 1,432,311.

Some economists profess to see in the destructive methods that are applied to industry throughout the world the possibilities of an eventual famine. It is certain that these methods are contrary to all the principles of thrift which have been taught in the past.

What Interested Him

Frenchman Not Admiring Young Lady As She Thought

A fair creature who returned recently from Paris has told us of a grand passion she encountered in the Cafe de Paris, where she lunched alone one day. A handsome Frenchman at a nearby table kept glancing at her while she opened a stack of mail she had just received from America, the glances apparently becoming progressively warmer as she proceeded. When she was about to leave, having paid her check, and got out of his life forever, it was too much for the boulevardier. He approached her, bowed, and said, "Madame, will you be so gracious as to permit me to remove the stamps from your letters?"—The New Yorker.

Has Overcome Obstacles

Hats off to Eleanor Gertrude Brown of New York who, in spite of being blind from birth and burdened by poverty and sickness, will graduate from Columbia University with the degree of Doctor of Philosophy. When some of us think we are having a hard time think of Miss Brown, who has made stepping stones of what most of us would count insurmountable obstacles.

An attack on the problem of international peace through a broad study of 150 years of the relations between Canada and the United States was announced by the Carnegie Endowment for International Peace.

Dr. James T. Shotwell, director of the endowment's division of economics and history, revealed details of a vast plan for surveying economic, social and political contacts between the neighboring nations.

While the project has been under way for two years, it had not been previously made public. The survey involves two more years' intensive research with large staffs working both in the United States and Canada.

At the same time, Dr. Shotwell said his division has completed its 150-volume history of the Great War, except for two volumes to be published in the autumn.

The study will cover the relations of the two countries from the time they were fur traders and forest rangers down to the present. The endowment expects the survey to produce a vast amount of valuable data.

Dr. Nicholas Murray Butler, president of the endowment, will head a central international committee to plan the character and scope of the survey.

Sir Robert Borden, Rt. Hon. Arthur Meighen, Senator Rudolph Lemieux, Sir Robert Falconer, Dr. C. W. Colby, Newton W. Rowell, K.C., Vincent Massey, Edward W. Beatty, K.C., Thomas B. Russell, John W. Diefenbaker and Dr. R. C. Wallace are the Canadian members.

Technical committees for each of the major problems will conduct the actual survey. Distinguished economists, engineers, historians and other professional men on each side of the border will participate.

Ten to 15 volumes dealing with subjects of outstanding interest are expected to be published within the next two years.

Make Good Messengers

Scotland's Girvan Pigeons Are To Be Depended On

Scotland's wonder birds, Girvan pigeons, are superior to the radio for transmitting messages from the lighthouse keeper at Ailsa Craig to the mainland, according to Archibald S. Girvan, postman of the Northern Lighthouse Commissioners, who takes the birds every Tuesday to Ailsa Craig. When the keeper wishes to get in touch with Girvan he releases the birds. The birds immediately makes for home carrying a message in an aluminum container. Under favorable conditions it flies the 10 miles in 15 minutes, but it is sure to arrive no matter how severe the weather. "I believe there is no service quite like this one in the world," says Girvan.

Artificial Rain

Experiments Being Carried Out In Russian Areas

Artificial rain was produced in the neighborhood of Achkhabad in Russia by scientists who have been experimenting to obtain this effect.

With the aid of chemical compounds they produced a fog on a sunny morning and as the wind carried this across the fields it deposited drops of dew on the soil. The same method will draw rain from a cloud, the scientists state.

These results are of great significance for in the great stretches of Turkestan and other areas in the U.S.S.R. days on which rain and snow fall over this area usually total but 100, leaving more than two-thirds of the year dry.

Like Ocean Travelers

We are like men and women who pass the decks of ships at sea; we seem to come back again and again to the place of our departure, but while we have been moving we have come into new latitudes and longitudes and the constellations themselves have altered their relationship to the journey on which we are bound. All this is a part of the deep meaning of life.

WORLD HAPPENINGS BRIEFLY TOLD

Nathan F. Gropper, Saskatoon, won the prize for the highest standing in second year dentistry at McGill University, it was announced.

Leon Trotzky has shaved off his famous beard and moustache to conceal his identity as he wanders about Europe seeking a new refuge. It was reported.

Winnipeg health authorities were seeking to stamp out a widespread but mild epidemic of measles. Altogether between Jan. 1 and May 12 a total of 4,695 cases have been reported.

The House of Lords approved in third reading the bill forbidding rodeos. The measure, which had already passed through the commons, was designed to protect animals from unnecessary suffering.

Japan's first official move in the trade deadlock with the United Kingdom was an effort to "induce the London government to modify the restrictions recently placed on imports from Japan.

Dr. Stewart Raeburn Kirk, assistant professor of geology at the University of Manitoba, died at Winnipeg after a protracted illness. He was 35 years old and was a native of St. Andrews, Scotland.

The United States department of commerce issued statistics showing the value of foreign liquors held in bond warehouses to have increased from less than \$5,000,000 Dec. 31 to almost \$19,000,000 at the end of March.

If Canadian and United States wheat crops are reduced by one-third by the recent dust storms, it will be a "godsend," said Hon. Earl Vrooman, former assistant secretary of agriculture in the Wilson cabinet of the United States, in an interview at Toronto.

Citing the rapid decline in the number of cases of tuberculosis in Saskatchewan, Dr. R. S. Ferguson, superintendent of Saskatchewan sanatoria, expressed the opinion that within the next ten years the disease will practically have vanished from the province.

Donald Cameron McGavin, third year arts student at United Colleges, is winner of the governor-general's gold medal for general scholarship in the faculty of arts and science at the University of Manitoba. He is the son of Dr. and Mrs. A. McGavin, Carman, Man.

Destroying More Coffee

Armando Vidal, president of the Brazilian National Coffee Department, estimated that Brazil's coffee crop for 1934-35 would be 8,000,000 bags, while the carry-over would be 2,000,000 bags. The amount of coffee destroyed to date has been 27,156,000 bags. It is planned to destroy 5,970,000 bags more on June 30.

The dahlias should not be planted until all danger from frost is over.

FRETFUL BABIES Quieted!

"If my three baby boys were restless with colic or peevish from their teeth I gave them a Baby's Own Tablet and they were soothed," says Mrs. T. Tweedy, 478 Millwood Rd., Toronto. "I give my little tablets before the child becomes fussy and well again. All the common ailments of little folk are promptly and safely corrected with Dr. Williams' Baby's Own Tablets. Price 25¢ at your druggist's."

Agricultural Notes

Many Items Of Interest To The Western Farmer

There are 680 genera of seed plants occurring within the Dominion of Canada.

The only broad-leaved evergreen tree in Canada is the Madrona. It is a small tree with thick leathery leaves and is found in the coast region of British Columbia.

The sales of branded beef in Canada for the first three months of 1934 totalled 8,609,435 lbs., an increase of 1,146,255 lbs. on the corresponding period of last year.

The disagreeable odour of the Canadian skunk cabbage is believed to be for the purpose of attracting carrion flies and thus securing pollination.

For the first three months of 1934, hogs graded in Canada showed an increase of 17,792 head over the corresponding three months of last year, namely, 835,538 in 1934; 817,566 in 1933.

Plantings of potatoes in Canada in 1933 increased one per cent., namely, 527,700 acres as compared with 521,500 acres in 1932, while the average yield was 78 cwt. per acre as against 76 cwt. per acre in the previous year.

The Canadian potato crop for 1933, according to the Market Extension Division of the Dominion Department of Agriculture, is estimated by the Bureau of Statistics at 41,296,000 cwt., an increase of 5 per cent. over the 1932 production of 39,416,000 cwt.

The problems confronting the cheese industry in Quebec are quite similar to those in Ontario. In both provinces, declining volume of output has had a tendency to raise production costs per unit of product manufactured.—The Economic Analyst.

The minimum temperature reached in winter in Canada is of great importance in determining the distribution of plants, more particularly in the case of shrubs and trees. Herbaceous plants are often protected from the effects of severe cold by a covering of snow.—Division of Botany, Dominion Department of Agriculture.

In the shipments of livestock from Western to Eastern Canada during the first three months of 1934, cattle, calves, and sheep showed an increase, and hogs a decrease, compared with the corresponding period of last year. Figures for the latter being within brackets: cattle, 21,188 (7,642); calves, 148 (19); sheep, 31,215 (26,140); and hogs, 66,367 (93,366).

For the inclusion of such unsuitable types as the majority of the cattle shipments to the United Kingdom in 1933, especially during the season when grass-fed cattle were loaded, was disappointing, writes the Canadian animal products trade commission in Great Britain, and it is injurious to the reputation of Canadian cattle as a whole. Only the right kind of cattle should be loaded for export.

The European apple sucker was first discovered in Canada at Wolfville, N.S., in 1919, and since that time has spread generally throughout Western Nova Scotia, as well as to the eastern section of New Brunswick and Prince Edward Island. To prevent further extension of this pest, a quarantine has been maintained on the known infested counties. This means that fruit growers in New Brunswick located outside of the counties of Westmoreland, Albert, King's, and St. John, may not procure any of the host plants from these counties, or from the provinces of Nova Scotia and Prince Edward Island.

Bordeaux Dust

In combating pea beetles, or in treating potatoes for insect enemies, a Bordeaux dust may be used in place of the regular poisoned Bordeaux spray. Such dusts can be purchased from all commercial spray companies ready mixed, or they may be prepared on the premises, provided a good mixing machine is available. The following is the standard formula for Bordeaux dust: Copper sulphate (dehydrated, and ground very fine) 12 pounds; hydrated lime, 80 pounds; arsenate of lime, 8 pounds.—Vegetable Insects Bulletin, Dominion Department of Agriculture.

FALSE TEETH

Dr. WERNER'S POWDER
Would you like false teeth to fit so firmly yet comfortably they feel natural—eat, sleep, laugh—all day long you can forget about them. Dr. Werner's Powder—prescribed by world's foremost dentists—is the one powder that assures 100% secure comfort. SPECIAL FEATURE—comfort-cushion protects sensitive gums—always keeps mouth clean and sanitary. Inexpensive—any druggist.

By Ruth Rogers

SPRINGTIME PRINT—AN EXCELLENT MODEL

With splendid aids towards slenderness and length.

A model of smart simplicity is this charming dress for casual day wear. What more, it is a style exceedingly becoming to figures no longer slim. For this season, the matron as well as the younger woman will be suited by it.

Navy and white crepe silk print with crisp white organdie finishing the neck, made the original model.

It can have short sleeves, and is lovely carried out in cotton prints, tub silk, etc., for summer.

Style No. 684 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Size 36 requires 3 1/2 yards of 38-inch material with 1/2 yard of 25-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coat carefully.

SUNDAY SCHOOL LESSON

MAY 27

THE LAST JUDGMENT

Golden Text: "We must all be made manifest before the judgment-seat of Christ."—I Cor. xiv. 25. Lesson: Matthew 25:31-46. Devotional Reading: Psalm 86:1-7.

Explanations and Comments

The Judgment, verses 31-33. When the Son of man shall come in his glory,—thus Jesus begins his parable of The Judgment. Compare Matt. 24:30; 25:8, 19.

At the Last Judgment, as Jesus' parable declares, he himself will sit on the throne of judgment, and before him will be met all the nations, and he will separate them as the shepherd separates sheep from goats, putting the righteous on his right hand and the unrighteous on his left.

"You can fancy what was in the Master's mind when he said he would part folk, a day coming, 'as the shepherd separates the sheep from the goats.' 'Tis a passing wise way, you see, of picturing what so many of us can explain, try as we will. Ah, they are a hearty and quarrelsome stock, these goats. Climbing everywhere—why are they like selfishness on legs! All day the shepherd must ward his sheep from them as well as he can, and when for some time comes he must make sure of shuffling them off for the common weal. And that, I take it, is like the judgment. Goat nature must be parted from kindly folk—so my thoughts often run, here where goats are on the hills." (William Allen Knight).

Service for Others is Service for Christ, verses 34-40. To those on his right hand the Judge will say, "Come, ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world."

The Fate of the Unrighteous, verses 41-46. To those on the left hand the unrighteous the King will say, "Depart from me, ye cursed, into the eternal fire which is prepared for the devil and his angels." The word for "hell" is "Gehenna." Gehenna was a field outside the city walls of Jerusalem to which the refuse and garbage of the city were carried and there burned.

Little Journeys in Science

VITAMINS

(By Gordon H. Guest, M.A.)

Among the notable discoveries made by scientists in recent years, is that of vitamins. While they are as yet not known to have shape, taste, weight or color, they have been found to be a very necessary part of the diet, and to prevent many forms of disease. They were first discovered to exist in certain foods by medical men who were experimenting with the effect of diet on health.

At about the same time, food chemists came upon these mysterious characteristics which could not be classified with fats, carbohydrates, proteins or mineral matter, the known components of food, yet which seemed to have definite life-giving qualities. Work is being constantly done by scientists in many lands, in an effort to find out exactly what vitamins are, but so far they have only been able to classify them according to what characteristics can be observed. As far as is known, vitamins contribute no material substance or energy to the body, but they act as what chemists call a catalyst, that is, they speed up the life processes. Vitamins have been designated by letters in the alphabet.

Vitamin A is found in green vegetables, Cod-liver oil and liver, and is growth-promoting. It was once thought it prevented a dread eye disease, but this theory is no longer held.

Vitamin B is found in vegetables, milk, wheat, fruit, graham flour and yellow corn meal. It is one of the most important members of the vitamin family, and it prevents beriberi, a dread disease contracted by people who live on polished rice.

Vitamin C occurs in fruit and to a small extent in milk. This vitamin prevents scurvy, a disease which formerly took many lives.

Vitamin D occurs in cod-liver oil and it prevents rickets in infants.

Vitamin E is found in meat, the germ of the wheat seed and in numerous other natural foods.

Vitamin G, only recently discovered, is found in some types of yeast and has growth-promoting qualities.

The total annual production of clovers and grass seeds in Canada has remained about the same in recent years.

If Past 45 and "Low" and Upset Look for Acid Stomach

HERE ARE THE SIGNS:
Nervousness
Neuralgia
Indigestion
Loss of Appetite
Stomach
Nausea
Auto-intoxication

WHAT TO DO FOR IT:

TAKE—2 teaspoonfuls of genuine Phillips' Milk of Magnesia in a glass of water every morning when you get up. Take another teaspoonful 30 minutes after eating. And another before you go to bed. DR.—Take the new pills, Milk of Magnesia Tablets—one tablet for each teaspoonful as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person. But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy—25¢ and 50¢ sizes.

ALSO IN TABLET FORM
Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia

Fight From London To Melbourne

Wiley Post Intends To Fly The Winnie Mae In Race This Fall

Wiley Post has announced that he is getting the Winnie Mae, the monoplane in which he circled the globe, into shape for a "two-day" flight from London to Melbourne, Australia.

The present record over that course is approximately one week. He will enter, he said, the MacRobertson international air race to be held next fall between the British and Australian teams.

MacRobertson has offered \$61,800 to the winner.

SOURD ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel cold, sluggish and generally wretched wake the mind of nature, all mineral water, laxative candy or pills, and ignore the liver.

What you need is to wake up your liver bile. Start your liver pouring the daily two pounds of bile into your lower bowels, your stomach and intestines working as they should.

Carters' Little Liver Pills will soon fix you up.

Get them by name. Refuse substitutes. 25¢ at all druggists.

Hedges will thrive best if the soil is kept cultivated and free of weeds to a width of two feet or more on each side of it. An occasional top-dressing of fertilizer may prove beneficial, particularly on light soil.

"I like to see something that has plenty of funny lines," says a dramatic critic. Then why doesn't he buy a zebra?

DENICOTEA CIGARETTE HOLDER

DENICOTEA Cigarette Holder absorbs the nicotine, pyridine, ammonia and resinous and tarry substances found in tobacco smoke.

Complete holder with refills — \$1.00 postpaid, or from your Druggist or Tobacco Dealer. Dealers wanted everywhere.

PROPOSAL MADE TO ABANDON ARMS PARLEY

Geneva.—A proposal to abandon the disarmament conference and report its failure to the League of Nations council was tentatively launched by conference leaders.

Although the idea has not been formally presented, it is known to be under consideration by statesmen seeking to inject new life into an ill patient.

Encouragement for friends of disarmament came at the same time in a statement of France's foreign minister, Louis Barthou, that he had not given up hope of an agreement, and in reports that Germany is considering returning to the conference.

Indications are that the powers are trying to force France to show her hand on the question of guarantees, and that France is trying to induce Great Britain to pact for mutual military aid in the event that either France or Britain is attacked.

Foreign Minister Barthou's proclamation tended to counter the move for eventual conference adjournment. The impression prevailed here that disarmament will continue in a deadlock until the 1935 Saar plebiscite decided whether that area will be returned to Germany, and until Germany herself returns to the conference.

Canada Not Dumping Wheat

General Manager Of Wheat Pools Denies Published Report

Winnipeg.—Denial of published reports that the Dominion government will dump its wheat holdings on the market was made by John I. McFarland, general manager of the Canadian wheat pools.

Rumors have been current among the grain trade for several days forcing selling of government holdings was contemplated.

The Ottawa correspondent of a weekly financial journal reported: "With about three months of the crop year remaining, it is learned here the Dominion government intends to force wheat on the market in order to bring Canada's exports up to the London wheat agreement total of 200,000,000 bushels. Sixty million bushels of Canadian wheat remain to be sold before the end of July and information here is that the wheat will be marketed notwithstanding slight price losses which may result."

Mr. McFarland stated no such policy has even been discussed in Canada.

In Motor Accident

Sir Austen Chamberlain Bruised And Badly Shaken

London.—Sir Austen Chamberlain, former foreign secretary, was bruised and badly shaken up as the taxicab in which he was riding collided with another cab in Grosvenor square and overturned. Examinations showed no bones were broken.

Lord Dawson of Penn, the king's physician, happened to be passing at the time of the accident and stopped his car to render aid. He was surprised to recognize the victim as Sir Austen and took him to his home.

A bulletin issued said: "Sir Austen was badly shaken and a great deal bruised when his taxicab was run into and overturned. Fortunately no bones were broken."

To Be Deported

Montreal.—The first sawaway of the trans-Atlantic shipping season here is Charles Kinnade, 28, native of the Isle of Man. He landed from the freighter Carmona, out of Newcastle. He pleaded guilty and was sentenced to four weeks in jail, after which he is to be deported.

Crack Distance Flyers

Paris.—A France's crack distance flyers, Paul Coudes and Maurice Rossi, are considering plans for a Paris to Los Angeles or San Francisco flight. In an attempt to smash their own non-stop record.

W. N. U. 2047

Boost Tourist Industry

Proposal Is Made For New Cabinet Post In This Connection
Ottawa.—A new cabinet post, that of minister of the tourist industry, was advocated before the senate tourist committee.

The new portfolio was proposed by Morgan Eastman, Toronto, former director of the Greater Vancouver tourist bureau and one of the organizers of the Puget Sounders, a bureau co-operating between Vancouver and Seattle, Washington.

Present provincial tourist activities are inadequate, Mr. Eastman said. The transportation companies are mainly concerned with the prospective tourist traveling by rail, while 75 per cent. of the tourists entering Canada come by motor. The bureau maintained by various cities have a purely local motive. There is not at present a national tourist consciousness designed to boost all of Canada and not the separate provinces. These were the reasons given for creation of the new portfolio.

The government has developed some wonderful attractions in our national parks, said Mr. Eastman. But these attractions are not being sold to the extent they should be in foreign countries.

"Why not have a new federal bureau placed under the direction of the minister of trade and commerce?" asked Senator Creelman MacArthur, Summerside, P.E.I.

The Canadian Pacific and the Canadian National Railways presented a joint brief to the committee, based on the present tourist advertising activities of the transportation companies.

The brief was prepared by J. Murray Gibson, general press representative of C.P.R., and C. K. Howard, manager of the tourist and convention bureau of C.N.R.

The railways advanced the plan that advertising in the United States under the government's own name might react unfavorably, tending to be denounced as propaganda.

Ontario Elections

Premier Henry Announces Voting Day June 19th

Toronto.—The Ontario general elections will be held June 19. Official nominations will be held June 12 and advanced polls on June 16 and 18.

Premier George S. Henry announced the dates and also dissolution of Ontario's legislature. Premier Henry made his brief announcement from the open window of his automobile as he left Government House. He had been conferring for 20 minutes with Lieutenant-Governor Herbert A. Bruce.

The lieutenant-governor signed the order-in-council providing for dissolution of the legislature and issuance of the writs. Premier Henry did not issue his election manifesto.

For three days Premier Henry and his cabinet have held conferences discussing the election date and preparing the Conservative manifesto. At the conclusion of the conference, the election date was forthcoming.

For weeks party heads have been campaigning in preparation for the vote. Premier Henry and his cabinet ministers have delivered addresses at numerous nomination meetings, and Mitchell F. Hepburn, Ontario Liberal leader, has waged a busy campaign.

Cowboys For Rodeo

Montreal.—Wild horses, steers, calves and cowboys, the makings of the rodeo that will be shown in London shortly, sailed from Montreal aboard the freighter Nortonian. Only 30 of the cowboys went in the freighter, however, the remaining 120 leaving later on the liner Aurania. The cowboys are from Alberta and several of the southwestern states.

Washington.—The \$40,000,000 item for the United States navy President Roosevelt included in his latest budgetary request to congress will be turned to the construction of submarines and destroyers.

Paris.—Dr. Louis Martin, one of the world's foremost authorities on contagious diseases, was named head of the Pasteur Institute. For 40 years Dr. Martin has been associated with the institute.

MAY HEAD BOARD

Hon. Gordon Harrington, former premier of Nova Scotia, and now leader of the Opposition in that province, who is mentioned as a possibility for the post of chairman of the Board of Railway Commissioners. The vacancy was created when Hon. C. P. Fullerton became chairman of the Board of Trustees of the Canadian National Railways.

Advances In Aviation

First Inland Aerial Mail Service In British Isles

London.—Two notable advances in British aviation were announced with the maiden flight of the Scylla, largest air liner in the world, and inauguration of the first inland aerial mail service in the British Isles, to commence shortly.

The Scylla made her maiden flight to Paris. Built for Imperial Airways, she carries 39 passengers, two pilots, a wireless operator and steward. She is powered with four 550 horsepower engines. The passengers are able to dine and hear radio programs.

The aerial service, to open in a few days, will run between Inverness and Kirkwall in the Orkney Islands.

Pennworth To Be Scrapped

Montreal.—Manseau Shipyards, Limited, of Sorel, Que., has purchased the British freighter Pennworth, it was learned here, and will scrap the vessel. The price could not be learned. The Pennworth grounded last autumn on the Island of Orleans, near Quebec City, and all efforts to free her proved unavailing.

Destroyer Taken Over

Lisbon.—A crew of British tars took over a Portuguese-built destroyer here in behalf of the Columbian navy.

Marketing Bill

Mackenzie King Approves Proposed Changes In Act

Ottawa.—A significant statement by Rt. Hon. Mackenzie King that the amendments proposed to the marketing bill by Hon. Robert Weir had met some of his objections to the measure was made in the house. The Liberal leader went further and suggested that if the government changed the legislation in respect to the powers of the boards to enact regulations and made such power a government responsibility, "as far as I am concerned I would cease to have any opposition to the measure as a measure of an experimental character."

Mr. King stressed that one of the basic things in the British constitution was the control of parliament over expenditures. This principle was ignored in the measure, he said. Expenditures under the bill should be made by appropriations of parliament. Strong exception also had been taken by the opposition, he said, to part two, which left it to a particular group appointed to investigate and determine what was to be an offence.

"I am glad to notice the government had taken account of the force of the exception taken to these clauses," said Mr. King, "and is proposing to make a material change which will meet all that there was in the nature of opposition to that part of the measure. The government is proposing to do away with the word 'determine' and substitute the word 'report'."

"That means that when an investigation is held a report will be made by the investigators to the minister and to the government. The report will be public and undoubtedly will be serviceable in helping to make more effective the law with regard to preventing the enhancement of prices or the restraint of trade which is unreasonable and unfair."

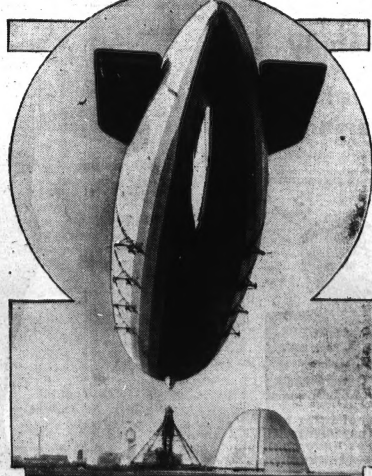

Lost Race With Fire

San Diego, Cal.—Overcome on a mountain trail in a desperate race from flames fanned by a strong wind, three Sera camp members perished in the forest blaze near Julian. The men, with about 22 others, had raced to safety from flames which threatened to trap them in a gully.

Narrow Nationalism

London.—The chief obstacle to the attainment of international security is a spirit of narrow and self-seeking nationalism which refuses to pay the price whereby security and recovery can be achieved, Sir John Simon, the foreign secretary, told the House of Commons.

U. S. SOUNDS DIRIGIBLE'S DEATH KNEEL

The pride of the United States Navy Air Force, the giant airship Macon is pronounced a failure after being unable to defend herself in fleet maneuvers off Cuba. In addition to her theoretical destruction by aeroplanes, the Macon sustained new actual damage which necessitates repairs in Florida. This is the second occasion in recent weeks that the giant airship has had to put in for repairs, and many believe unless she shows better in her new tests with the fleet, no more airships will be built by the United States. Here we see the Macon swinging in the breeze as she lies anchored to her mooring mast.

NEGOTIATIONS BETWEEN WHEAT DELEGATES ENDED

London.—Ten days of private negotiations between the big four wheat delegates ended, leaving in doubt the question whether Argentina can be prevented from breaking the 1935 wheat agreement.

A report of the deliberations was being sent to the governments concerned, including Canada, the United States, Australia and Argentina.

It was indicated the report includes a tentative compromise arrangement under which no set amount would be loaned to Argentina on her quota under existing wheat export agreements.

It was known that during final sessions a firm demand was presented that Argentina curb her alleged dumping. Dr. Thomas Le Breton, heading the Argentine delegation, came here May 6 in the hope of obtaining a 40,000,000 bushel loan.

Saskatchewan Claims

Natural Resources Case Presented To Dymally Commission

Ottawa.—Saskatchewan's claims against the Dominion, growing from federal administration of the province's natural resources from 1905 to 1930, were presented formally before the Dymally royal commission.

The commission has been sitting since February 5, with long adjournments necessitated by hearings in Regina as well as Ottawa. A vast amount of documentary evidence was submitted by both sides previous to the opening of oral arguments.

P. H. Gordon, Regina, chief counsel for Saskatchewan, placed the province's total claim at \$161,629,751. This was made up of a claim for 31,000,000 acres of land the province charges the Dominion with having alienated, with a tentative value of \$4 per acre, a total of \$124,207,460 with interest; waste of taxes, \$2,538,335; loss of grazing rentals, \$1,157,909; loss of timber revenue, \$26,698,276; school lands and school land endowment fund, \$7,127,571.

J. MacGregor Stewart, Halifax, chief counsel for the Dominion, advanced tentative counter claims of \$170,000,000.

The Saskatchewan Act was passed in 1905 only after a great deal of opposition had been smoothed out, Mr. Gordon told the commission.

When Saskatchewan entered confederation, September 1, 1905, the province was not permitted to exercise any rights with respect to administration and control of its resources, he said. The province was thus placed in a position of inferiority with the other provinces.

Withdraws From Commons

Mitchell Hepburn To Devote Time To Ontario Provincial Affairs

Toronto.—Mitchell F. Hepburn, Ontario Liberal leader, announced he would submit his resignation as member of the Dominion parliament to Rt. Hon. W. L. Mackenzie King, Liberal leader.

Mr. King will hand Mr. Hepburn's resignation to the speaker of the house on June 11, the day before the official nominations in Ontario.

"This should set at rest all doubt as to whether I am withdrawing from the Dominion parliament and devoting my whole time henceforward to the leadership of the Ontario Liberal party in the provincial election campaign," Mr. Hepburn declared.

Northern Flight Record

Edmonton.—A new record was established in northland flying when Pilot Archie McMillen, Canadian Airways, flew into Fort Resolution and returned to Fort McMurray in record time with a load of six passengers and a heavy consignment of fur. This flight is two weeks ahead of the previous 'earliest flight' into Resolution.

Serving Notice on the Gov't.

The people of Edson town and nearby districts have been trying for a number of years to get the Government to build a passable road from Edmonton for their use. The Edson Signal has done valiant work in bringing the present poor condition of the road to the attention of the authorities. It now seems that patience has ceased to be a virtue, as The Signal has this to say in its issue of May 10:

Unless something is done, and done quickly, to get gravel for the dirt portion of Jasper Highway, the prospects are that we shall go thru another season with the same kind of road we have been suffering with for years. When preparations were made last year to have men placed at work crushing gravel for the Highway, we thought that at last this fight to have a decent road to Jasper had come to an end, and that we could look forward to seeing the thousands of tourists that would undoubtedly come this way. Now we are not so confident. The amount of work done in the 20c-a-day-and-board camps has not been worth the trouble of establishing them, and it easy to believe that the work done has cost more than if a contractor had been given the job, which is actually the case. It is not a question of money that is keeping the gravel off the Jasper Highway, it is a question of keeping the auto tourists out of the Park as long as possible; and if the Government wants to create a situation here which will make it extremely difficult for one of their supporters to get this seat at the next election, they are going the right way about it.

The Motorist's Prayer.

Teach us to drive thru life without skidding into other people's business;

Preserve our brake linings that we may stop before we have gone too far;

Help us to hear the knocks in our motors and close our ears to the clashing of the gears of other folks;

Keep the gasoline in our tanks and alcohol out of our stomachs; Absolve us from the mania of trying to pass the other car on a narrow road;

Open our eyes to the traffic signs and keep our feet on the Brakes.

Record Low Upkeep.

After traveling 100,149 miles in his Chevrolet coupe, a traveler for a Toronto brewery check up on his upkeep costs. His record of adjustments showed new pistons at 92,000 miles, a valve grind and 2 clutches—the total expense being under \$50. It works out to about 1-20c per mile.

Another good record comes from a Banff owner of a Chevrolet 1933 coach; the car has 33,104 miles on the speedometer, and the only upkeep item so far has been a set of spark plugs.

Rounding Up Redskins.

Are there any members left of the ancient tribe of cigar store Indians? Of course you would not remember them, but your father might. The wooden redman used to be as common as barber poles; then suddenly they disappeared. They were gone before any one seemed to notice. An Ontario newspaper a few years ago tried to find some of the lost tribe, but had very little luck. General Motor dealers all over Canada are looking for the departed redskins. Have you a little wooden Indian in your attic? If so, tell your nearest G.M. dealer—he's interested.

R. C. Services.

Rev. Father McBriarty, of the Redemptorist Order, Edmonton, will preach Missions at Duffield and Warman during the week commencing Sunday May 27.

Rev. Father Kosieski, of Holy Rosary parish, Edmonton, will preach a Mission at Carvel during the week commencing June 10. Sermons will be in English and Polish. On Sunday, June 10, Father Rosieski will offer Holy Mass in Stony Plain at 9:30.

AFTER ACCIDENT SHE PUT ON WEIGHT

Kruschen Took It Off Again!

A woman sends the following account of the consequences of an auto accident in which she was involved:—
"A year ago I had a very bad automobile accident, which left me more or less a cripple. Having to lie in bed so long, and being unable to move, I began to put on flesh. When I was able to walk a little again, I found I was 144 lbs., and being just under 5 feet you may guess how I was placed. So I thought I would try Kruschen Salts, and I must say they have done me a lot of good in every way—but chiefly in keeping my weight down. In three months I lost 5 lbs. Then I left off taking the Kruschen, and I soon went up to 142 lbs. again. So at once I got more Kruschen, and again steadily reduced. My weight last month was 134 lbs.—(Mrs. W. H. M.)

Kruschen combats the cause of fat by assisting the internal organs, to perform their functions properly—throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Gypsies" Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, successful architect, trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter and Camilla are reconciled. Avis invites them to a party, where she introduces Peter to well-known artists and public men.

(Now Go On With The Story)

CHAPTER XLIV.

"A title is always very important," Avis observed, and turned to Camilla. "Don't you think so? It has so much to do with the success of a book or play or picture. And it does with a piece of sculpture, also. It should strike the public's imagination, as well as being appropriate to the subject."

"Of course," Camilla agreed. She reflected that she probably knew more about that than Avis did. Wasn't that her obligation in her work—to attract the public eye with a few well-chosen words? "Have you anything in mind?"

"Several," Peter nodded, "but I've been so busy with the untold things finished that I haven't given it much thought. No use to have a

name, however alluring, without an object to go with it."

"I had an idea the minute I saw it," Avis explained. "Just the one word, 'Inspiration' seems to me to fit it exactly. What do you think of it?"

Camilla repeated the word thoughtfully. "It sounds rather well," she hesitated.

Avis recoiled instantly. Her displeasure over Camilla's semi-enthusiasm was almost visible. She turned to Peter confidently. "Don't you like it better, the more you hear it? Doesn't it sort of grow on you?"

"I believe it does," he admitted, then turned to Camilla. "Have you a suggestion, dear? The committee is open to any new idea, and anxious for one."

"I've thought a lot about it," she confessed, smiling. "I have a list of ideas written down at home, but the best one I have thought of is 'Eager Youth.'"

Silence for a moment, dominated by Tillie's clashing of china and silver in the kitchenette. "Say, that's hot, all right!" Peter exclaimed. "Well, you stay little cricket—had a whole page of titles topped by a prize winner and you haven't said a word!" He was immensely pleased.

"I was waiting for you to tell me your own idea first, so you wouldn't be influenced by mine," Camilla explained quickly. "I wanted the whole thing to be yours, title and all, unless you got stuck and I could help you out."

"Gosh!" he enthused, "Am I in luck to have two women working their clever brains to name my story. It ought to be good!" He turned to Avis. "What do you think of that one, 'Eager Youth'?"

"Very good," she agreed instantly, but she thought to herself, "I'll handle you, alone."

"Anyway," Peter decided, "we have another week to think it over. It won't take long to scratch the title on when it's finished. Both of you keep up the good work and we'll vote on the final selection."

Camilla remained with Peter for what was left of the night, but it was only four hours later that she resolutely left him to his work and returned to her own apartment for a busy day of routine tasks, preparing for the clothes for the following week, and an afternoon nap that refreshed her for the evening, when Peter came to take her to a movie.

It was entertainment which permitted them to relax as that of the previous evening had not done; and although they were in a crowded theatre, they might have been entirely alone for the two hours in which they sat close together in the darkness and watched the tragedy of human emotions on the screen evolve into the miracle of happiness. There own emotions had been intense in the crisis of those make-believe lives, and it was with relief that they witnessed the final dissolution of all strife and misunderstanding.

"They always live happy ever after," Peter laughed.

"They should, after all that effort to deserve happiness. Not all stories end happily, but I like them to do better when they do, don't you?"

"I guess everyone does. Still, you remember the tragedies longer. I guess that is why a few authors dare to leave them that way. True to life, too. There are plenty of real tragedies in real life that never end in happiness."

"Yes, and the saddest ones of those we never know about. Sudden death, murder, failure, are not the real tragedies. The worst ones are lived behind smiles and service, in silence. But we are going to have a happy ending," she added cheerfully and confidently.

"You know it," he affirmed quickly. "At least, we are going to give the controllers of destiny a fair struggle."

"Just imagine, Peter, you may be in Paris in less than two months," she reminded him wistfully.

"I doubt it. If I'm not, I'll be earning some real money, though. Always, the human mind is forced to measure achievement in financial terms, because the world ruthlessly demands that 'with the same measure that ye mete withal, it shall be measured to you again.' Each man measures his neighbor's success by that standard, by which the world judges him in return. It is no more fair than the scale of civic justice, but it is irrevocable. Effort and tal-

ent are cast into the discard for the glittering display of possession.

Camilla experienced her first measure of tangible achievement when she arrived at the office on Monday morning and Margaret Blaine greeted her with:

"Have you seen the new issue of Weekly Review? Your Tiny Tots scamper all over the centre double-scanner all over the centre double-scanner."

A strange exultation rose up in Camilla's breast and she seemed to soar in the air like a flying bird. Her shining eyes just looked at the droll little figures. She could not speak.

"Well, aren't you thrilled to death to see them for the first time in actual print?" demanded Margaret. She was secretary to Mr. Weeks and held a profound respect for creative talent.

"Of course, I am," Camilla confessed. "But what shall I do about it?"

"Say, if that was my stuff, I'd make whoopee like an Indian—well, I don't know what I would do!"

"That's just about the way I feel. That is why I don't do anything at all. They do 'look darling, don't they?' she added fondly, quite as if anyone else had created them and she was admiring them.

"Do they! If that ad doesn't make the kids notice and demand Wheat-hearts, nothing will!"

"I hope you are right," Camilla said quietly. "Again, that standard of success confronted her. Her work would be praised or condemned according to the measure of its return measured in gold to her employers. Margaret's opinion did not make it good, nor the opinion of any critic.

But if that sickle composite mind that is known as public opinion, chose to favor her work with its passing approval, her work would then turn to gold for her employers and, in turn, gold for her—and her work would be good!"

Camilla telephoned to Peter during her lunch hour. "Have you seen the new Weekly Review?" her voice sang with exuberance.

"No, I haven't."

"Well, rush out and get a copy and feast your eyes on that middle spread, done your very own wife."

"Will I! Congratulations, darling. I'm terribly proud of you. When do we celebrate?"

"When you finish the figure. Then it will be a double celebration for the famous Ansons."

"How, famous?" he laughed.

"Just among ourselves, for awhile."

"Okay, honey. I won't lose a minute getting that magazine, you can bet. I'll call you back later, and tell you what I think of this new Anson artist."

Camilla accomplished little work that day. Every employee and executive had to compliment and comment upon the initiation of the Tiny Tots into the world of affairs at large and advertising in particular. Each was optimistic regarding their popularity, and Camilla walked again on winged feet with her head in the clouds of hope.

Her elation was not obvious. If possible, she was more quiet and reserved than usual. For deep emotion is not expressed in sounds and actions. It is lived within the heart and soul. Only superficial emotion manifests itself in violent demonstration.

(To Be Continued)

A new bait for grasshoppers is being tried out by U.S. Department of Agriculture, oil being substituted for molasses in mixing the brain and arsenic. Oil baits, it is stated, do not deteriorate during storage as rapidly as molasses. A Canadian water-mixed bait has been found to have a distinct attractiveness to the insects, because grasshoppers like to drink when they eat.

Great Salt Lake in Utah is more than four times as large as the Dead Sea.

MINARD'S

"KING OF PAIN" INIMENT

Quick Relief Now From Neuralgia

JACK, I'M SEEING CLARK ABOUT THAT BIG ORDER IN 40 MINUTES AND I HAVE SEVERAL NEURITIS... WHAT CAN I DO?

S. LATER
WELL, JACK, I GOT THE ORDER! YES, FELT IT AS A FIDDLE... YOU BET, I'LL ALWAYS GET ASPIRIN WHEN I WANT QUICK RELIEF FROM PAIN.

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And that is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer is in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

Cunard Sailings

Initial Trans-Atlantic Trips Marked

By Heavy Passenger Lists

The 21st Lawrence season of the Cunard and Anchor-Donaldson Lines opened recently with the arrivals and departures of the Ausonia and the Athenia. The Ausonia made her first appearance early in May and from now on, these companies will maintain practically a weekly service to Plymouth, Havre and London and to Belfast, Glasgow, and Liverpool, throughout the summer and autumn until the close of the St. Lawrence.

Liners on this route will, beside those mentioned, include the Letitia, Ausonia, Ausonia and Ausonia. The initial departures have been marked by heavy passenger lists in all classes and this, with the advance reservations already made up summer sailings, would indicate that this will be a good year for trans-Atlantic business.

Slight increases in exchange rates in certain European countries have been more than offset by falling prices abroad; the many lands, hotels and railways have reduced their tariffs by as much as half.

Indications are that this will also be a good cruise year. Last winter the veteran Mauretania in her all-white dress and with her gayly decorated rooms, enjoyed enormous popularity in her West India cruises from New York. After being newly furnished, she will make similar "sea-breeze" cruises to the West Indies from New York, commencing July 21.

On June 20th the Carinthia will make a cruise from New York to the North Cape and Russia. Short cruises to the Saguenay, Quebec, Munay Bay and Bermuda will also be made on the California, Transylvania and Franconia, some cruises including a call at the Bay of Islands in Newfoundland.

One of the most popular cruises will probably be that made by the Franconia on September 18th from New York to South America. Under the joint management of Thos. Cook & Son, American Express Co., and the Cunard Line, this cruise will carry hundreds of Canadian and American pilgrims to attend the Ecclesiastical Congress being held this year in Buenos Aires. Calls will be made in Havana, Trinidad, Rio de Janeiro, en route to and from the Argentine Capital.

The popularity of the short cruise in Britain has been phenomenal. This year will see an extensive programme of such sea excursions from Liverpool, Glasgow, and Southampton to the Atlantic Isles, and the Mediterranean and around the British coasts.

The semolina of the Kubanka, Ottawa 37 variety of wheat is valued highly for the manufacture of macaroni.

Little Helps For This Week

"Obey my voice and I will be your God and ye shall be my people; and walk ye in the way that I have commanded you, that it may be well unto you." Jeremiah 7:23.

And oft, when in my heart was heard
Thy timely mandate, I deferred.
The task, in smoother walks to stray;
But These I now would serve more strictly, if I may.
—W. Wordsworth.

"Pray Him to give you what the scripture calls 'an honest and good heart', or 'a perfect heart', and without waiting begin at once, to obey Him with the best heart you have. Any obedience is better than none. You have to seek His face; obedience is the only way of seeing Him. All your duties are obediences. To do what He bids is to obey Him, and to obey Him is to approach Him. Every act of obedience is an approach, an approach to Him who is not far off though He seems so, but close behind this visible screen of things which hides Him from us."
—J. H. Newman.

As soon as we lay ourselves at God's feet we have enough light given us to guide our own steps; as the foot-soldier who hears nothing of the councils that determine the course of the great battle he is in, but hears plainly enough the word of command which he must himself obey.—George Eliot.

One of the private gifts to Great Britain's new cruiser Neptune, is a painting of the Neptune that fought at Trafalgar.

KEEPING UP QUALITY.

The reputation of Canadian wheat on the markets of the world is due to the efforts western farmers have made to keep up the quality of their production.

And the reputation of United Grain Growers is similarly based on unremitting efforts to keep up the quality of its service to farmers in handling their grain and furnishing them with farm supplies.

Spruce Grove News.

Mr and Mrs F M Baker motored up from Fort Saskatchewan on Sunday and were afternoon visitors with Mr and Mrs R N Sherwin.

Mrs Herman Ducholki is spending a short holiday with her parents Mr and Mrs Gilson.

Mr and Mrs John Getsinger were Sunday visitors with Mr and Mrs A Schenlein Sr.

Mrs A A Driscoll, Jasper, spent a few days' vacation here last week with her sister Mrs Forbes.

The tennis court committee haven't quite decided as to when they will hold their annual meeting. However, play has been resumed on the court in preparation for the opening tournament.

Mr Gordon Murray moved out on Tuesday, and is said to have purchased a service station at Carleton corner.

Mr Jac Brox had a truckload of hay taken in to the packers yesterday.

Farmers in the district have been highly pleased at the recent copious rains.

Quite a large number of the friends of R Goetz in this district attended the funeral service at St. Matthew church Sunday Aft.

As was expected, the Community League dance Friday Evg. drew a large crowd, the City being well represented among the dancers. The sum of \$25 is said to have been cleared over expenses.

Considerably more interest is being taken in the local horsehoe contests.

An interesting ceremony took place at the Grove's United church Sunday morning last, when the mortgage on the edifice was burned in the presence of the audience by the pastor Rev W E Sieber. Those who took part in the service were: Dr Cloy Jackson, Edmonton, and Rev John Wood, Bellevue, Alta. The latter gentleman was the clergyman in charge when the structure was erected. The United congregation at Stony Plain had been invited, and attended in a body.

Holborn Happenings.

The usual good crowd is expected to assemble today at the 11th annual picnic of the Holborn U.F. Local. A good list of prizes for the various events has been arranged. A dance in the evening finishes off the day.

Last Sunday's church service was held in the Hall, when Mother's Day was commemorated. Pastor W E Sieber was in charge.

A meeting in the interests of the Wheat Pool is billed to be held in Holborn Hall on May 28.

Stony Plain and District

"Bob" Stoker, Sangudo, was a visitor in town on Saturday. A letter received this week from Mr J Christie indicates his motor party had reached Portland, and were pushing on to Tacoma. All hands were well at the time of writing.

There was no service Sunday evening at the United church, the members having attended the special service at the Grove in the morning.

A return game by the girl basketballers from the Grove will be played here the latter part of the week.

The town ball team played Concordia college on Monday and lost out 7-2. Our lineup: E Mayer c, P Enders p, Maschmeyer 1b, O Oppertshauer 2b, G Gitzel 3b, Walt Rosnan ss, W Ulmer lf, Alf Enders cf, Art Lutz rf, Key Theiss umpire.

BUTTER AND EGGS WANTED
at The Royal Cafe.

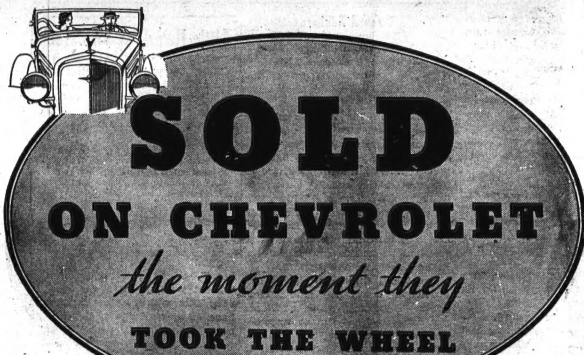

"High Horse,"

a 3-act play, will shortly be shown here. It will be presented by the Y. P. S. of St. Peter's church, Edmonton. It was shown at Concordia College Friday and was well received. Those in the cast are: The Misses M. Giese, C. Hennig, M. Schienbein, Miss W. Giese, E. Giese; M. Mrs. Hy Baron, P. Beitsch, W. Schienbein, H. Miller, O. Schultz.

Municipal Districts Unite.

Representatives from 13 municipal districts surrounding Edmonton met Monday in the City for the purpose of discussing the advisability of forming a local association and other matters of municipal administration of general interest. Hon R G Reid gave a brief address, pointing out the advisability of co-operation in many matters of municipal affairs. It was decided to organize a district association to be known as the Edmonton Union of M.D.s, with F W Haythorne Pres.

The following districts were represented: Sturgeon, Black Mud, Spruce Grove, Clover Bar, Stathcona, Tatwinaw, Ray, Opal, Inga, Lockertie, Liberty, Leslie, Hazelwood.

There are 5 cars to choose from in the low-price field . . . YET MORE THAN 1 OUT OF 3 BUYERS PICK NEW 1934 CHEVROLETS

NATURALLY we are proud to have created Canada's most popular automobile. All the more so because people are counting values—comparing quality—checking on delivered prices—as never before in automobile history.

Chevrolet has always been stronger on proof of value than on mere "claims". People recognize this in Chevrolet's many exclusive features: Fully-enclosed, protected "Knee-Action" Body by Fisher, valve-in-head six cylinder engine with Blue Flame head, Fisher built-in Ventilation, exclusive YK frame, to mention just a few.

And just as long as motorists go on comparing, checking and testing, Chevrolet will hold and increase its great sales leadership. Because Chevrolet refuses to compromise on quality. The industry's leading engineers . . . the great General Motors Proving Ground . . . and an organization with "an ear to the ground and an eye to the future" . . . take care of that. Low delivered prices—easy GMAC terms.
